COMPLETE PREVALENCE

Overall number (or proportion) of cancer survivors

TIME TO CURE

CANCER REGISTRY AREAS

Time span after cancer diagnosis necessary to eliminate excess mortality due to cancer. It is measured as the time necessary to reach a 5-year conditional relative survival (that is the probability to survive additional five years) >95%.

CANCER REGISTRY AREAS

ALREADY CURED SURVIVORS Patients who have survived longer than time to cure.

CURE FRACTION

Proportion of cancer patients who are expected to reach the same death rates of the general population and will not die as a result of their cancer.
