### COMPLETE PREVALENCE AND PROPORTION OF ALREADY CURED SURVIVORS BY SEX

**COMPLETE PREVALENCE**  
Overall number (or proportion) of cancer survivors.

**TIME TO CURE**  
Time span after cancer diagnosis necessary to eliminate excess mortality due to cancer. It is measured as the time necessary to reach a 5-year conditional relative survival (that is the probability to survive additional five years) >95%.

**ALREADY CURED SURVIVORS**  
Patients who have survived longer than time to cure.

**CURE FRACTION**  
Proportion of cancer patients who are expected to reach the same death rates of the general population and will not die as a result of their cancer.
